About us

FROM COMMENCEMENT TO DATE

Fresh Pack began as a startup initiative of Emirates Plastic Industries a subsidiary of the Al Mulla group of companies. The main vision of the organization to build a brand of plastic packaging and industrial solutions to its clients following the latest standards and market competitiveness.

Due to limitations in the market in the plastic packaging division Fresh Pack was able to produce various specifications and options for its consumers and began its own production unit in 2017.

Fresh pack now is one of the largest plastic manufacturer in the GCC. On 30,000 square meter of factory land, our state-of-the-art facility is capable of producing 8000 metric tons of finished products per year. Every step in the production process is undertaken by experienced and qualified operators, under close supervision and strict quality control standards.

Our meticulous selection of raw materials purchased from both local and overseas suppliers augment our products to achieve the highest quality.

MISSION

To administer and operate an extensive portfolio of existing companies, while recognizing and developing new Investment

VISIONS

To be a leading regional conglomerate that creates value for its customers and its employees

GOALS

To offer solutions with the production expertise in reasoning with the latest standards and economy.

“Reaching your goals,
your expectations”
